

SAINCE

IT Services-
Healthcare Industry

SAINCE is a leader in providing information technology and healthcare process outsourcing services to customers across the country. Our core competence lies in providing IT services to technology companies and process outsourcing services to healthcare providers. We work with some of the leading healthcare technology companies in their product or application development/maintenance efforts, as well as outsource business processes for some of the TOP 50 US hospitals in the country.

Our IT consulting services offering comes with a deep knowledge of the healthcare technology domain and perfectly complements our technical capabilities in the areas of Microsoft, Java, IBM or SAP technologies. When you leverage our understanding of the healthcare technology space with our information technology expertise, you will be able to achieve more and more. More productivity with high cost efficiency. So whether your need is to outsource work offshore and take advantage of cost efficiencies or exercise better control by keeping it in-house, our services will help you achieve your goals.

SAINCE works closely with customers to develop comprehensive solutions that address their business needs while ensuring compliance to stringent regulatory requirements. Our team comes with knowledge of healthcare industry specific standards like HL7, HIPAA, compliance standards from JCAHO, processes of a provider etc. **SAINCE** effectively addresses operational issues facing customers in the healthcare industry. It pro-actively develops cutting edge services that help customers not only in sharpening their competitive edge, but also help in integration challenges arising out of merger and acquisition activities. It leverages resources nationally and internationally to enable business growth and profitability for customers.

SAINCE has the expertise to engineer solutions, develop and deploy products, develop customized software and provide support and consulting services. The group also has the capability to provide either shared or dedicated business process outsourcing services from its state-of-the-art delivery center in India.
