

SAINCE

IT Services–
Manufacturing Industry

SAINCE focuses on providing Information Technology and Business Process Outsourcing services to our customers in North America. We work as a part of your team to conceptualize and realize technology driven business initiatives. Our promise of successful delivery in services and solutions is backed up with consistent customer feedback and measurable improvement in business performance. We excel in providing services in environments where technology can impact core business processes and deliver tangible and measurable improvement in performance.

SAINCE excels in providing IT services and packaged software implementation services to the manufacturing industry. It has developed an in-depth understanding of the various segments that make up the manufacturing industry and has delivered innovative solutions to a diverse set of businesses. It works closely with customers to develop comprehensive solutions that address their business needs while ensuring compliance to stringent regulatory requirements.

SAINCE effectively addresses operational issues facing customers in the manufacturing industry. It pro-actively develops cutting edge services that help customers not only in sharpening their competitive edge, but also help in integration challenges arising out of merger and acquisition activities. It leverages resources nationally and internationally to enable business growth and profitability for customers.

SAINCE has the expertise to architect solutions, develop and deploy products, develop customized software and provide maintenance support and consulting services. The group also has the capability to provide either shared or dedicated business process outsourcing services from its state-of-the-art delivery center in India.

IBM TECHNOLOGY BASED SERVICES

As an IBM Business partner our services include a broad suite of IT consulting, implementation, integration and support services via our highly skilled professionals. Our team averages seven years in the business with strong IBM backgrounds. We have IBM Certified Specialists in all major IBM technologies.

We have the know-how to improve business performance across organizational silos, across business processes and across technology platforms. For each engagement, whatever its scale, we mobilize selected resources from our global network. And while our culture of service excellence encourages us to explore new concepts and solutions, our strategic focus never varies: delivering competitive advantage for your business success.

Regardless of where you are in the SOA adoption process or what your future SOA plans may entail, our IBM technology focused services can help you incrementally implement an SOA solution that can show return on investment at each stage. Pricing is based on flexible financial models that include traditional consulting pricing or fixed prices.

If you are thinking IBM technologies, think **SAINCE**.

MICROSOFT TECHNOLOGY BASED SERVICES

Our suite of Microsoft services include all aspects of software life cycle including design, development, testing, integration and maintenance. **SAINCE** can also help build or migrate your existing applications on to the Dot Net platform and help develop and deploy webservices or get you on the path to reaching your services oriented architecture goal. **SAINCE** is your ideal partner because it has an in-depth knowledge and experience in Microsoft technologies and delivers business value within time and budget constraints.

SAINCE manages Microsoft and .NET projects for you irrespective of size.

SAINCE has successfully executed projects using a wide array of Microsoft tools and technologies ranging from MS Access to .Net framework and from desk top applications to server and enterprise integration. The majority of projects are executed in the Software Application space to address your critical business problems.

SAINCE has a large, talented resource pool of developers, technical specialists and architects proficient on the Microsoft platform.

SAP SERVICES

Today's enterprises require the help of industry leading enterprise and e-business solution to stay of the curve. A true partner offering incomparable value when it comes to seamlessly integrating extended solutions built around SAP.

SAINCE is considered a leader in providing cost efficient SAP services geared with the ability to meet the full spectrum of implementation services. **SAINCE'S** SAP services encompass the full suite of SAP R/3, mySAP and Netweaver solutions. Most of employees in our SAP practice are SAP certified with years of functional business knowledge and in-depth technical expertise.

SAINCE'S SAP experts will work with your IT specialists on:

- End-to-End Implementation and Roll-Out
- Integration
- Development / Enhancement
- Support and Maintenance
- Web Enabling
- Version Migration
- mySAP.com
- Netweaver
- Enterprise Portals
